announces

Short Term Management Development Programme

(Online Delivery)

BIM FOR COLLABORATIVE CONSTRUCTION

Start Date:

August 22, 2021

Objective

To provide a holistic understanding of BIM process and to provide a hands-on experience of various BIM-related software applications.

**Register and book
your seat.**

Introduction

Building Information Modelling (BIM) is a 3D model based concept coined to deal successfully with the problem of fragmentation and error in the process of building project creation until its implementation. BIM is about developing a system which can house or manage all of the information needed in a particular project in a single data repository that could be reused and repurposed by various project participants.

In this context, NICMAR has conceptualized and developed Open Enrolment Management Development Programme on BIM for Collaborative Construction to keep business managers updated as well as to make eligible for the emerging new work opportunities.

Who Can Attend

- ✚ Graduates from Architecture/Engineering/Planning background;
- ✚ Construction Industry professionals;
- ✚ Candidates who are looking to work in the AECO field.

Features

- ✚ The sessions will be delivered only on Sunday by using both online sessions & on-campus classroom;
- ✚ Experienced faculty;
- ✚ Well-developed course material;
- ✚ Hands-on practice using BIM related software application;
- ✚ Experience sharing by industry experts.

Short Term Management Development Programme BIM FOR COLLABORATIVE CONSTRUCTION
